Modulram *Series*

MODULRAM SERIES

Your oven
Your rules

A family of electric ovens, compact and completely modular. Their efficient performance guarantees the perfect baking of different types of dough, able to satisfy the most demanding of palates.

Bread batches with tradition

The mother dough is the best kept secret in achieving the true taste of artisan bread. Always wanting to provide you with the best quality, we guarantee a baking process which preserves the characteristics of the dough, giving it not only an artisan look, but an irresistible flavour as well.

On point

The total control of the temperature at the floor, roof and front of the oven, enables perfectly uniform baking, adaptable to different products.

Non Stop batches

The steam injection system enables perfect baking, batch after batch.

**Maximum heat,
maximum safety**

The door, built with a thickness of 30mm and with two tempered and frontal thermal cut glass panels, meets the essential safety conditions, so that you feel comfortable whenever you have to touch the door.

Find the ideal oven for you

The entire series is modular, enabling you to create a customised oven system suited to your type of business and production. We have developed the most robust oven on the market, prepared to ingeniously answer all your needs.

Small details make a big difference

- Independent control of the temperature at the floor, top and front of the oven
- Doors with a robust construction with a thickness of 30mm and double panes of tempered glass
- Metallic door seal, avoiding recurring replacement of common rubber seals
- Deck with a frontal thermal cut glass panels, meets the essential safety conditions and energy efficiency
- Possibility of specific heating elements for products with special needs of high temperatures and thermal shock

TOUCH SCREEN PANEL

Technology in *the palm of your hand*

The touch screen panels are intuitive and very easy to use.
No manuals, no complications.

Find a new way to organise
your recipes.

- Consult, enter and organise recipes by type
- Different baking phases with customisation of duration, temperature, steam and automatic opening of steam vents
- A panel that takes care of itself. Follow the recommendations to get the most out of every oven batch
- Programming of different oven start and stop times on the same day, depending on the workflow, for greater energy savings
- All information regarding the baking status is displayed dynamically, using graphics, timers and notifications

LCD AND DIGITAL PANEL

All functionality *in the right measure*

We have developed an accessible
operating panel to help you bake
with maximum quality

Find a universal graphic language
understandable to all with the Lcd panel.

- Save up to 40 programmable recipes
- Programing of a daily oven start
- Receive maintenance warnings
- Possibility of turning off steamers individually therefore economising power

Explore and interact, in an accessible
experience with the digital panel.

- Three displays indicating the temperature of the bottom, top and front
- Programing of a daily oven start up
- Possibility of turning off steamers individually therefore economising power
